DETAILED ACTION

Claims 1-38 are currently pending in this application. Claims 29-38 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference, which anticipates one group, would not render obvious the other.

Information Disclosure Statement

Applicant's Information Disclosure Statements, filed on 13 September 2004 and 26 July 2004 have been considered. Please refer to Applicant's copies of the 1449 submitted herewith.

Priority

Applicant's claim of the benefit of U.S. Provisional Application No. 60/461,134 filed on 09 April 2003.

Response to Restriction

Applicants' election of Group I, claims 1-28 (in part), drawn to the compounds

represented by formula (I),

, and specific compound of Example 11,

, in response filed on 15 November 2006

acknowledged. Because Applicants did not distinctly and specifically point out the supposed

Art Unit: 1626

errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Therefore, the restriction requirement is deemed proper.

In accordance with M.P.E.P. 821.04 and *In re Ochiai*, 71 F.3d 1565, 37 USPQ 1127 (Fed. Cir. 1995), rejoinder of product claims and method of use claims commensurate in scope with the allowed product claims will occur following a finding that the product claims are allowable. Until such time, a restriction between product claims and process is deemed proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The scope of the invention of the elected subject matter is as follows:

Compounds of formula I,

, depicted in claim 1, wherein: A

represents ; W is CH₂; Y is as defined; Z is as defined except that it does not represent a heterocyclic group; R¹ is H, OH, NH₂, OC₁₋₄alk, SC₁₋₄alk; R⁸ is H, OH, CN, C₃₋₄alk; R²-R⁷ are as defined.

The scope of the invention of the elected subject matter have been extended to include the definition of the variables of R¹ and R⁸ as defined except that they don't represent a heterocyclic group.

Art Unit: 1626

As result of the election and the corresponding scope of the invention identified supra, the remaining subject matter of claims 1-36 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn compounds contain varying functional groups such as triazine, homopiperazinyl, thiomorpholinyl, propylaminyl etc, which are chemically recognized to differ in structure and function. This recognized chemical diversity of the functional groups can be seen by the various classification of these functional groups in the U.S. classification system, i.e. class 544 subclass 63(+) (thiomorpholine), class 540 subclass 450(+) (homopiperziny), class 544 subclass 180(+) (triazines), 548 subclass 400(+) pyrrolidines etc. Therefore the subject matter which are withdrawn from consideration as being non-elected subject differ materially in structure and composition and have been restricted properly a reference which anticipated but the elected subject matter would not even render obvious the withdrawn subject matter and the fields of search are not co-extensive.

Claim Objections

Claims 4-29 are objected to for containing non-elected subject matter.
